

Universal ATR Breakout Box

ASI-CTS-9

Description of Operation:

The ASI-CTS-9 is a Universal ATR Breakout Box used to gain access to all pins comprising up to three full-height, Thinline connectors. Signals to/from these connectors are available at the tip jacks mounted on the ASI-CTS-9 front panel. The tip jacks are labeled and color-coded to enhance usability.

Using the ASI-CTS-9 is simple and requires no modification to aircraft wiring, simply plug the ASI-CTS-9 between the wiring harness and the LRU to gain access to all inputs and outputs.

The ASI-CTS-9 uses full-height, 4-row (160 pin) Collins Thinline Connectors (qty 3).

The ASI-CTS-9 comes in a weather resistant carrying case for ease of handling and protection.

Equivalent OEM: Collins
Equivalent MN: CTS-9
Equivalent PN: 622-6720-001

Units Tested:
DPU-85()
FCC-85()
MPU-85()
DPU-86()
FCC-86()
MPU-86()

Equipment Specifications:

Height: 12.00" Width: 18.00" Depth: 17.00"
Total Cable Length: 19.00'

Optional Equipment

Universal ATR Breakout Box

ASI-CTS-10

Description of Operation:

The ASI-CTS-10 is a universal ATR Breakout Box used to gain access to all pins comprising up to three half-height, Thinline connectors. Signals to/from these connectors are available at the tip jacks mounted on the front panel of ASI-CTS-10 chassis box. These tip jacks are labeled and color coded to enhance usability.

Using the ASI-CTS-10 is simple and requires no modification to aircraft wiring, simply plug the ASI-CTS-10 between the wiring harness and the LRU to gain access to all inputs and outputs.

The ASI-CTS-10 uses half-height, 4 row (60 pin) Collins Thinline Connectors (qty 3).

All tip jacks are mounted on a protective chassis box for easy access.
